**Stellenbezeichnung: Data Engineer (m/w/d)**

Digital. Inspiring. Unique.

Tchibo is one of the ten largest eCommerce companies in Germany. We could never have attained this standing without the courage to constantly rethink the old ways. In the digital world at Tchibo, we work with the latest technologies to develop sustainable and effective solutions. Do you want to help us do this? Enrich our team with your fresh ideas!

Your tasks: You make the difference with us.

- As a **Data Engineer (m/f/d)** with a focus on **Marketing and Customer Analytics**, you will be part of the Tchibo Marketing Analytics & Applied Data Science team, which follows the mission to support the departments in the company with insights and **professional data service**s in the best possible way.
- You contribute with your **data engineering expertis**e to ensure that our **first and third party marketing and customer data** can be used at the right time and in the right quality where it will add the most value.
- As the **owner of our data pipelines**, you will ensure the smooth and efficient operation and continuous development of our reporting and analytics processes on the **Google Cloud Platform.**
- You will be part of the **ML-Ops Team** to help to ensure operations on the **Google Cloud Platform**
- You will **work closely with our Data Scientist**s to implement automated **machine learning processes.**
- You will also support the **design and implementation of shared services** (DataCatalog, ML Model Management,..) in the Data Mesh approach.
- You will meet a **strong team of Business Analysts, Data Scientists and Analytics & Data Engineers,** for whom fun and performance are two sides of the same coin, and as part of our cross-functional Data Engineering Community you will have the opportunity to regularly exchange ideas with like-minded people.

Your profile: You keep reinventing us.

- You have successfully completed a **degree in economics/computer science, mathematics, business administration** or a comparable qualification and **have professional experience in the business intelligence environment**.
- You feel at **home on cloud platforms (e.g. GCP & AWS)** and are familiar with tools such as **Airflow, Docker and MPP databases**.
- You are fluent in analytical programming languages like **Python** and **SQL** and use them to build your solutions.
- You bring experience in **cloud-native architectures** and Data Mesh is no foreign word to you.
- Your **distinctive technical-analytical thinking** as well as a structured and solution-oriented way of working distinguish you.
- In addition, you have a good command of written and spoken German.

Your benefits: Together we stay different.

- Profit from **30 days of vacation** and the **possibility to work from home office**. We also offer **holiday care for children, family services, and some company-owned day care placements** - so that you can combine your work with your private life well.
- Our headquarter is located centrally and easily reachable by public transport, for which you can also get a **travel allowance**.
- You will receive an **employee discount** on all Tchibo products and we will monthly give you a **package of Tchibo coffee** of your choice for private enjoyment.
- There is something for every taste: with a **restaurant, bistro, cafeteria and free drinks**, you are well looked after. At Christmas, there is even the Tchibo Christmas roast, which also available in the vegan option.
- In our "Freizeitzentrum" you can use our **fitness room, go for a swim in the swimming pool and participate in our sports courses**.

Our job suits you? Then we are looking forward to your application! It's super fast: upload attachments, two motivation questions answer - done. **Without a cover letter**!
