Stellenbezeichnung: Senior Mobile App Engineer (m/f/d)

Creative. Innovative. Different.

Tchibo is so successful because we shape change sustainably. We combine tradition and innovation, calling on all our creativity, passion and skill to surprise our customers with an ever-changing range of theme worlds while remaining true to our coffee tradition. Support us in shaping the future with courage and common sense!

The **App Team** brings the **Tchibo e-commerce platform** to the fingertips of all mobile customers and users. We are responsible for the development of the Tchibo App and implementation of user-facing features with the focus of creating an exceptional shopping experience.

We are a **cross-functional** and **self-organized agile** team that takes ownership of the **design**, **development**, **testing** and **frequent releases** of our products. Since our app is the gateway into all Tchibo-shop related processes, it integrates a variety of **microservices** to achieve a seamless shopping flow that fulfills the high demands of our **over 1 million customers**. With this in mind the **reliability** and **robustness** of our products are crucial for us.

Your tasks: You make a difference with us.

- As a **Mobile App Engineer (m/f/d)** in our **App Team**, **you are responsible for the continuous development of the Tchibo App** - from concept to operation.
- You develop end-to-end with the **full technology stack** (frontend, backend, infrastructure, and CI/CD) and write **clean** and **high-quality code** on a daily basis.
- Ensuring a **high standard of quality** by providing **code reviews**, **pair programming**, **TDD**, **giving feedback**, and using **best practices** (e.g. style guidelines, testability, efficiency, and robustness) belongs to your role.
- Furthermore you contribute to technical **documentation** and content related to the use of our framework.
- You **work and learn together** with software engineers from our other development teams.

Your profile: You keep discovering with us.

- You have a successfully completed degree in **computer science/ business informatics** or have a **comparable qualification**.
- Professional experience in **cross-platform Mobile App development using Flutter** is part of your portfolio as well as a **passion for new technologies**.
- You are a true team player and are keen to play a role in **cross-functional teams**, always working together in an agile way (**SCRUM**).
- Prevoiusly you gained in-depth knowledge of **one or more modern programming languages** (e.g. **Dart**, **Kotlin**, **Java**, **TypeScript** or **Python**).
- You have experience with **RESTful API design specification**, knowledge of how to write **REST endpoints** and **API specifications** is natural to you.
- In the past you already worked with API-Backends written in Spring boot.
- You work hands-on with **Git**, **DevOps**, **Terraform**, **Kubernetes**, **and automation (CI/CD)** and you have knowledge of web development.
- You have already got acquainted with **cloud computing** services like **Google Cloud Platform (GCP)** and monitoring and analytic tools like **Datadog**.
- Confidence in writing and speaking in **English** completes your profile.

Our benefits: Together we stay different.

- Profit from **30 days of vacation** and the possibility to work from **home office**. We also offer **holiday care for children, family services**, and some **company-owned day care placements** – so that you can combine your work with your private life well.
- Our headquarter is located centrally and **easily reachable by public transpor**t, for which you can also get a **travel allowance**.
- You will receive an **employee discount** on all Tchibo products and we will monthly give you a package of **Tchibo coffee of your choice** for private enjoyment.
- There is something for every taste: with a **restaurant, bistro, cafeteria and free drinks**, you are well looked after. At Christmas, there is even the **Tchibo Christmas roast**, which also available in the vegan option.
- In our "Freizeitzentrum" you can use our **fitness room**, go for a swim in the **swimming pool** and participate to our **sports courses**.

Our job suits you? Then we look forward to your application! It's super fast: register, upload attachments, answer two motivational questions - done. **No cover letter needed!**
