JOIN THE TEAM

We as Global Digital Services enable BASF's digitalization. In agile teams, we develop innovative digital solutions for BASF and its customers, create new exciting customer experiences and business growth, and drive efficiencies in processes. We provide IT that works and offer know-how and access to latest technologies in the areas of cloud computing, blockchain or big data.

RESPONSIBILITIES

As part of the Plant Design, Documentation & Maintenance product family, our product team is responsible for lifecycle support of the whole engineering tool landscape of BASF (e.g., CAE, CAD tools). In this position you will manage the engineering tool landscape of BASF. Your responsibilities will be:

- Tool lifecycle support
- Administration of Client-/Server-/Database Systems, Installation, configuration and operation of complex IT Tool landscapes
- Evaluation of new release versions
- Sizing of infrastructure requirements and requesting Server- / Storage-infrastructure accordingly

- Setup, update, and configuration of tools (Server and Client), as well as Troubleshooting on Server and Client infrastructure
- Roles and Rights administration
- Quality control and documentation

QUALIFICATIONS

- IT education with System integration focus, bachelor's degree in business IT, computer science or equivalent education or working experience
- good knowledge of Windows Client- and Server Operating System and respective Client-/Server application landscape
- knowledge of Active Directory structures, Group Policy, Roles, and Rights management
- Database administration skills (MS SQL, Oracle)
- scripting and modification of scripts (with VBScript, PowerShell)
- good German and English language skills

BENEFITS

- Attractive remuneration and a variable bonus
- Support with childcare (e.g. company daycare, holiday programmes)
- Fitness and health studio, medical center with numerous offers for your health
- Mentoring programs and learning opportunities for your professional and personal development
